London, UK

## Education

### Newcastle University

Sept 2012 -  
July 2015

#### BA Architecture: 2.1

Newcastle-upon-Tyne, UK

Whilst studying at Newcastle University, I was challenged with developing numerous design briefs from the concept stage through to coherent design proposals. The design process for each project included weekly one-on-one design tutorials and interim critiques that prefaced a final critique. This process involved presenting design work to peers and teachers from various design studios to gather opinions, criticism and advice from diverse perspectives. The projects included a variety of restrictions which helped to inform the direction and outcome of the proposed scheme. During this procedure I gained skills in critical thinking, self-critique and design analysis. The projects allowed for the exploration of materials, scale and experiences through sketching and prototype-testing.

### University of Leeds

Sept 2011 -  
July 2012

#### BEng Architectural Engineering: N/A

Leeds, UK

### Queen Elizabeth Grammar School

Sept 2004 -  
July 2011

#### Secondary Education

Wakefield, UK

#### Advanced Level

| A  | Physics                |

## Experience

### RMA Architects

Nov 2015 -  
Present

#### Architectural Assistant

London, UK

From the professional experience of working in a thriving architectural practice, I have developed further ability in time-management, teamwork and working under pressure. I have worked across multiple projects at various stages of the design cycle. This varies from inception, where I have overseen the design of a set of luxury houses that achieved planning permission to the detailed design of construction tender packages.
